

# DATA SHEET

## Optimum network connection.

**Easily and quickly connect to the router and other WLAN-enabled devices in your network even across greater distances.**

DUAL BAND WLAN AMPLIFIER

## WLR-755 AC

Often, the speed and reception quality between WLAN-enabled devices in the network suffers from interference by structural circumstances.

The WLR-755 AC quickly and effectively amplifies the range of your network based on the latest AC standard. Enabling transmission rates of up to 733 Mbps and being compatible with all standard WLAN standards. The three integrated aerials of the WLAN amplifier provide an optimum data transmission, free from interference

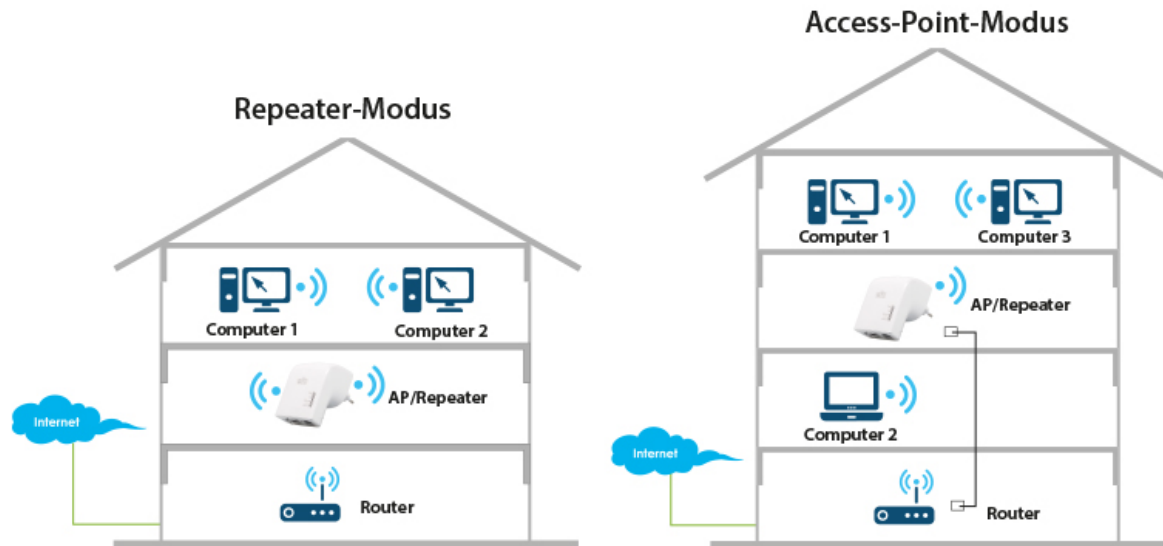

Optional use as WLAN amplifier, Access Point or Client. The WPS button allows easy configuration as a repeater with the press of a button.

### HIGHLIGHTS

- WLAN generation with 802.11ac standard
- Usable as WLAN amplifier, Router and Access Point.
- Transmission rates of up to 733 Mbps across the entire band width
- Compact construction with 3 integrated aerials
- Integrated mains connector and 2x RJ45 interfaces
- Free Apps for quick and simple installation

## Technical Data

Connections:	Wireless & wire
Data transfer rate:	Up to 733 Mbps of total bandwidth
Wireless standards:	IEEE 802.11 ac/a/b/g/n
Mode:	AP, repeater and router
Encryption:	128-Bit WEP, 64-Bit WEP, WPA, WPA2 and WPA/WPA2
Antenna:	3x Built-in antennas
Power supply:	Internal (100-240V, alternating current)
LED Indicator:	Power, LAN, WAN/LAN, WiFi/WPS

## ACCESSOIRES

- ✓ Network Cables
- ✓ Instruction manual
