

DATA SHEET

Old hits, brought right up to date.

Listen to your favourite vinyl and digitise in MP3 format - simply and conveniently without a PC.

USB RECORD PLAYER WITH BLUETOOTH HS-T08

Digitise your music and convert it to ageless MP3 files!

The USB turntable plays your records or MP3s with brilliant sound quality. The record player can be run at all the standard speeds (33, 45 and 78 rpm), making it suitable for all record formats.

You do not need a PC to digitise your music. The modern turntable converts your favourite music from vinyl records directly to MP3 files and stores them on either an SD card or a USB stick.

The music data can be edited on a PC using the software supplied. Alternatively, you can play your music collection from a Bluetooth device directly on the turntable.

HIGHLIGHTS

- USB record player with conversion function
- Integrated loudspeakers with an output capacity of 2 x 1 W RMS (2 x 10 W PMPO)
- Direct conversion (encoding) to MP3 - no PC required
- Three speeds (33 1/3, 45 and 78 rpm)
- Auto stop
